

ACRYLIC SEALERS

Below is a list of recommended acrylic sealers for use with Midnight Groundface.
Please contact us if you would like more information.

Phylon 1422

(solvent based with 25% solid content)

Chemprobe Coating Systems, L.P.

Division of Tnemec Co., Inc.

Garland, TX

(972) 271-5551

www.tnemec.com

Phylon1422 is a non-yellowing, acrylic coating. Phylon 1422 highlights the natural color of the PRAIRIE stone by providing a clear, semi-gloss sheen. The treatment does not alter the natural texture of the surface, nor significantly affect the vapor transmission qualities of the PRAIRIE stone. Phylon 1422 provides a durable, wet-look finish to exposed aggregate, Groundface block, Textureface and many other masonry and natural stone surfaces.

Bright Seal

(solvent based with 26% solid content)

TK Products, Division of Sierra Corp.

Minnetonka, MN

(952) 938-7223

www.tkproduct.com

Bright Seal is a blend of 100% methyl methacrylate polymers used as a superior final sealer and protective coating on exposed aggregate, architectural concrete brick, PRAIRIE stone or any cementitious materials where yellowing or discoloration cannot be allowed. The coating is clear and does not yellow with age or exposure to ultraviolet rays. Bright Seal intensifies the color highlights of exposed aggregate and adds sparkle to the finished project, increasing the aesthetic value and longevity of the property.

KOLORCLASSIC SEALER

(solvent based w/24% solid content)

United Products Corp.

Fremont, NE

(402) 727-7525

www.unitedproductsonline.com

KOLORCLASSIC SEALER is a high performance compound designed to provide high gloss sealing qualities that are resistant to yellowing from ultraviolet exposure. It has a gloss finish, is extremely tough and has excellent resistance to dirt stains and most other liquids. To be used for interior or exterior applications and is UV stable.
